

Nuova Tecnica Trasporti is a company of 40-years experience in the world of heavy loads and machines in the material handling sector. Our SP battery tugs allow easy movement of heavy loads in absolute autonomy and security for users and operators. In the condition of a warehouse floor our electric pusher can move the equipment in any direction with the capacity up to 30 ton. It helps to optimize industrial processes. The pushers can be coupled with our transport steering skates, and can be connected with any kind of frames on the wheels.
